Greetings from the ambassador

Dear Reader,

Welcome to the Royal Norwegian Embassy's July 2017 version of the catalogue of Norwegian companies in Malaysia. I hope you will find it useful.

As you will see, many Norwegian companies have been here for a long time, like Aker Solutions, formerly Kvaerner. Jotun also has a long and proud history in Malaysia and two large factories as well. DnV-GL runs a regional presence from their office here in KL. Jordan produces its high standard toothbrushes and other oral hygiene products in Malaysia. Telenor has a thriving business through DiGi, and the Wilhelmsen offices manage ships all over the world and about 10 000 sailors out of KL. Yara sells Norwegian fertilizers all over the country. As you will see in this directory, there are many more.

Norwegian investments in Malaysia are large and have increased considerably over the last years. The Government Pension Fund Global ("The Oil Fund") has invested in about 200 companies in Malaysia, at a value of close to 19 billion Ringgit. Norway is now the 9th largest investor country in Malaysia.

Norwegian companies and industries are recognised worldwide for having the highest ethical and moral standards with zero tolerance for corruption of any kind. I am proud of the Norwegian firms here in Malaysia, with whom the Embassy has a close relationship. We have some of the flagships of Norwegian industry here, and I hope more will come.

The Embassy has open doors for Norwegian companies, and we are eager to help newcomers to start up business in Malaysia.

So please, feel free to contact us, any time.

Telephone: +60 3 21710000. Email:
emb.kuala.lumpur@mfa.no

Sincerely yours,

Hans Ola Urstad

*HE Hans Ola Urstad,
Norway's Ambassador to
Malaysia*

Malaysia Norway Business Council (MNBC)

Tromsø, Norway.
Photo: Bård Løken – Visitnorway.com

The main objective of MNBC is to provide a forum for discussions and exchanging views on business conditions. Both domestic and international affecting Malaysian and Norwegian firms operating in Malaysia. MNBC is a non-profit making body and is financed entirely from members' subscriptions, entrance fees and surpluses arising from specific activities.

We have a wide range of benefits for all our members. Such as 24 hours' access to MNBC Online web site to stay in touch with the very latest news, networking events e.g. luncheon talks and MNBC's quarterly Water Holes etc. Members have opportunities to meet and get personal advice from fellow members and to invite business associates to the various events.

As a member, you will be invited to attend the regular "Water Holes" social networking meetings, normally held at the residence of the Norwegian Ambassador. Other events include the annual Scandinavian Christmas Dinner where you may invite clients and business associates to meet political leadership within selected ministries and senior personnel in targeted departments and government agencies.

For corporate members, we offer free listing at the MNBC Online web site ("Norwegian Companies") with a full-page company profile. The listing is continuously updated at MNBC Online web site. This represents an excellent opportunity to promote your products and services. Corporate Members' logo will appear in the rotating add on to the MNBC front page and much more. For many years MNBC has been supporting various Charity Organizations with sizeable donations. Worthy recipients are selected by the board of directors. We are of the opinion that this is an area that MNBC and the Norwegian community can make a positive and lasting impact in Malaysia by helping deserving and underprivileged children get a chance to fit into a more competitive environment.

Jørgen Torp, Chairman

Number of employees: 40 (Parent company: approximately 3000)

Year established in Malaysia: 2012 (Parent company: since 1929)

Parent company: Norconsult AS

Norwegian shares in %: 100%

Annual turnover: MYR 30 million

Overview of company:

NorPower Sdn Bhd, a wholly owned company of Norconsult AS from Norway, was established in October, 2012 in Kuching, Sarawak. The birth of this Company came when Sarawak Energy Berhad engaged Norconsult AS for Hydroelectric Power Projects and Transmission Lines in line with the state's SCORE Program in Sarawak.

NorPower Sdn Bhd provides consultancy services to the Energy Sector from earliest pre-investment & feasibility studies, through planning, design, construction supervision, to project implementation and operations by combining local Sarawakian resources together with Norconsult's worldwide expertise from our Head Office and other subsidiaries around the globe.

Recently, NorPower Sdn Bhd has added Completion Management System(CMS) together with Project Management Services into the list of consultancy services of the Company.

Website:	N/A
Operating sector:	Supply of equipment and services to oil & gas industries
Geographical business area:	Malaysia
Number of employees:	7 permanent staff and others are on project basis
Year established in Malaysia:	1994
Parent company:	N/A
Norwegian shares in %:	30%
Annual turnover:	RM 8 million

Overview of company:

Since start-up in 1994 North Blaze (M) Sdn Bhd has had the same core business namely fiscal/custody transfer metering, sampling and analysis of hydrocarbon liquid and gas. In these 20 years we have introduced a number of new technologies, mostly from Norway. This includes multiphase meters, high accuracy water cut meters, sophisticated sampling and mixing receivers in titanium and composite materials, ultrasonic sand detection systems and helical turbine meters.

Most of Malaysian oil production is now measured by these turbine meters, at one stage or the other. We have also provided consultant services for governmental bodies in East Timor, Ghana, Nigeria, Norway and Turkey. Most of it financed by Norad.

Year established in Malaysia: 1976

Parent company: Yara International ASA

Norwegian shares in %: 70%

Annual turnover: RM 150 million

Overview of company:

Yara International ASA has grown and prospered since the company was first listed on the Oslo Stock Exchange in 2004. Yara is now widely viewed as a major player not only in its core chemical industry but also as an industry shaper on issues ranging from food supplies to environmental protection.

Yara, with roots going back more than 100 years, remains the world's largest supplier of plant nutrients. With operations in more than 50 countries and sales to more than 150 countries, it has a major share of the global mineral fertilizer market.

The company has production sites in 16 countries and holds strong positions in niche markets as well, from emissions reduction products to animal nutrition. Yara is also the largest trader of ammonia in the world. From its corporate headquarters in Oslo, Norway, Yara runs worldwide production and support operations that employ 12,883 people (number at year-end 2015). The Norwegian State is the company's largest single shareholder.

Norway Malaysia Association

Lofoten, Norway
Photo: Jørn Allan Pedersen – Visitnorway.com

The Norwegian Malaysian Association was started in 1990, as a non-commercial, voluntary organisation, to promote cultural, educational and commercial contacts between Malaysia and Norway.

When NMA was first founded, knowledge about Malaysia in Norway was limited but over the years Malaysia has become a popular business and tourist destination. As a result the role of NMA in Norway has evolved.

NMA now provides a forum where Malaysians in Norway, Norwegians and others interested in Malaysia can meet, share experiences and not the least indulge in our love of the Malaysian culture and cuisine.

We have several events a year, the Annual General Meeting (AGM) where practical, organisational details are discussed, get-togethers to commemorate Malaysia's diverse religious and cultural heritage and most important, the Merdeka Day celebration. Culinary contributions and culture play a significant role in all these gatherings.

NMA aims to help Malaysians, living in Norway or sent to Norway by their employers, by giving them practical assistance when requested or needed.

We have a board with 6 members elected for a two-year term at the AGM, and one permanent advisor, who is also the founder of the association.

Uma Ganesan Asbjørnsen
